ECO-FRIENDLY STRAWS
SINGLE-USE SERVING OPTIONS

OUR STRAW STORY

FEATURES & BENEFITS

Because One Size Does Not Fit All...

We offer an assortment of PLA and PAPER straws in three standard lengths and multiple diameters.

5.25" Long straws from kiddies to cocktails

The length and narrow diameter make these straws ideal for kids to use for single-serve milk or juice cartons, etc. and for adults to sip their cocktails on the rocks.

7.25" Long straws are the sipping standard

These straws are one of the most common lengths and the variety of diameters provide many serving options. The narrow diameter straws are the standard for fountain drinks, while the wider diameter straws work well for milkshakes and bubble teas.

10" Long straws for tall teas or blended beverages

The added length of these straws will allow you to sell larger, more profitable drinks, the wider [8mm] opening assists the customer with better pull-through of even the thickest malts and smoothies.

What's the Best Diameter for the Drink?

- [3mm-5mm] diameter straws are typically used for kid drinks or adult drinks served in highball glasses.
- [6mm] diameter straws are the standard opening size.
- [8mm] diameter straws are typically used for mixed or blended drinks such as malts and smoothies where better pull through is required.

Today's Straw Trend...COLOR!

Accessorize your tabletop or to-go cups with brightly colored and patterned straws, from basic black to bamboo to stripes. We have eight ways to add that extra pop of color to your service.

Eco-Conscious Solutions

Our environment-friendly straws are available in paper and/or plant-based material (PLA). Our straws are a renewable resource. Our paper straws are biodegradable and our PLA straws are compostable*.

Individually-Wrapped or Bulk Packs

Keep your straw service sanitary, especially in high-volume venues such as cafeterias and fast food restaurants. We stock a variety of individually-wrapped straws in most sizes and colors. Unwrapped bulk packs are also available.

To Store and Serve

Our classic Stainless Steel, two-sided straw dispenser (#237) holds up to 500 wrapped straws. Our cylinder-shape straw canister (H714CH) adds a great touch of nostalgia to any tabletop service at delis, diners, ice cream shops, etc and holds 72 straws (up to 7 3/4" length). Both dispensers are easy to fill and clean. *Straws sold separately.

Promote a Lifestyle, One Straw at a Time!

Our straws are available in biodegradable paper or compostable PLA (See back for more info).

PAPER STRAWS

PAPER STRAW Q&A:

Are they safe to use with food?

Yes. Our straws are all FDA, EU and CA Prop 65 compliant.

Are your straws biodegradable?

Yes. Our straws are safe for you and the environment. They are made of paper and a food grade adhesive that will break down quickly in a compost, marine, or landfill environment

Are they coated with beeswax?

No. We use an eco-friendly wax adhesive that is both FDA, EU and CA Prop 65 compliant.

How long do they last when in use?

They are designed to be single use, but your paper straws will last up to 4 hours before getting soggy - far beyond the typical length of a meal service.

Are they gluten, gmo and bpa free?

Yes, Yes & Yes. All of our paper straws are free of gluten, gmo or bpa.

Can they be used in hot beverages?

No. Although all of the components are food safe, for best performance, we recommend using the straws for cold beverages only.

Are custom straws an option?

Yes. Custom designs available, lead times may vary.

PLA STRAWS

PLA STRAW Q&A:

What is PLA?

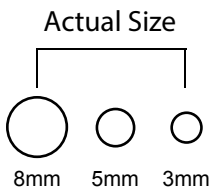

Polylactic Acid (PLA) is a bioplastic derived from renewable resources like corn starch or sugar cane. Most other plastics, by contrast, are made from non-renewable materials like oil or natural gas. In addition, PLA takes as much as 65% less energy to produce, making it a two-fold win for the environment.

Is PLA compostable?

Yes. PLA will degrade in under 6 months in a commercial composting environment.*

Can PLA straws be used in hot beverages?

No. Although all of the components are food safe, for best performance, we recommend using the straws for cold beverages only. High temperatures could make the material soft and reduce its practical life.
